SPRING ENRICHMENT CLASSES

Date: March 4, 11, 18, 25, and April 1

Time: 9:00 a.m. – 1:00 p.m.

Fee: $227 ($23 for Free/Reduced Lunch Students)

816 S. Walter Reed Dr.
Arlington, VA 22204

AUTOMOTIVE GLASS REMOVAL & TINTING I & II (Grades 7-12)
Whether it is due to a break in, accident, rock chip or extreme temperatures; having a shattered glass is not fun. In this enrichment class you will learn how to safely remove and reinstall automotive removable glass. We will learn about all the components involved in making the window roll up and down: regulators, motors and switches. To top it off you will learn how to properly install window film. Window Tinting on its own can become a career, specially in a populated area like the DC, Maryland, and Virginia.
In order to take Level II, student must have completed Level I.

COSMETOLOGY: The Art of Looking Great! (Grades 3-12)
Caring for your hair and nails is the beginning of looking great. Students will learn and practice creating a look that flatters their personal style. Hair styling, cutting and coloring will be discussed and demonstrated. Students will learn skills that will save money at the nail salon including manicures, pedicures and nail art.

MULTIMEDIA AND TV PRODUCTION (Grades 3-6 & Grades 7-12)
Multimedia production utilizes an all-digital lab to teach students of all skill levels. Students will have the opportunity to learn about graphic design, video and audio production and music programs. They will then bring their ideas to life in TV production. Students learn how to master the camera, using state-of-the-art equipment, teamwork, imagination, and creativity to create their films. Students will produce their own commercials, music videos, short movies, studio shows and more. This class will be challenging, fun, and cutting edge.

PET CARE (Grades 3-6)
Students will work with our large animal collection that includes a horse, goats, parrots, reptiles, rodents, ferrets, cats, dogs, etc. Proper care and grooming for these animals will be demonstrated. Responsible treatment and disease prevention will be stressed. Students will participate in animal enrichment and taming. The type of veterinary specialties and animal careers will be discussed. Students will have the opportunity to bring in their well-mannered pet for help with grooming or training. The specific animals studied will be tailored to the interests of the students.
